What Should You be Able to do for the Solving Systems of Equations Quiz?!

* Determine how many solutions a system of linear and/or absolute value equations will have.
- there will be a chart like the "Solve" section of the Tic-Tac-Toe homework
- also be able to identify the number of solutions for systems like the following:

    A. $y = |x + 9| - 2$ B. $y = |x + 3|$ C. $y = |x + 2| + 5$
            $y = -|x + 9| -2$ $y = |x - 3|$ $y = -|x + 2| - 8$

* Solve systems of equations by graphing, substitution, and elimination

* Explain whether or not a given point is a solution to a given system

- Design a system of equations to model a real world situation, and use your system to solve a problem.
